3.5 cups ≈ 1 lb; ½ cup ≈ 2 oz; 1 Tbsp ≈ 0.5 oz

Vegetable Gardens & Flower Beds: To prepare new gardens, apply 5 lbs per 100 square feet and thoroughly mix into the top 3" of soil. For new transplants, add 1-2 Tbsp per hole, mix into soil and water in well.

Containers: For new plantings, add ¼-½ cup per gallon of soil and mix thoroughly **OR** add 12.5-25 lbs per cubic yard. For established plants, mix 2-4 Tbsp per gallon of soil when transplanting.

Trees, Shrubs & Vines: For new plants, prepare transplant hole and mix 1-2 cups with the backfill soil. Use amended soil to fill in around the new plant and water in well.

WHAT IS "N-P-K"?

NITROGEN (N) - Nitrogen is necessary for lush, green, leafy growth. An excess, however, will promote vegetative growth at the expense of fruit or flowers. Nitrogen is generally applied at higher concentrations in early growth stages. Use Down To Earth Bat Guano, Blood Meal or Feather Meal.

PHOSPHORUS (P) - Phosphorus will promote big, bright blooms and enhanced fruit production. Phosphorus is essential for fruiting, flowering, strong root growth and quality seed development. Use Down To Earth Fish Bone Meal or Seabird Guano.

POTASSIUM (K) - Potassium, or Potash, helps produce strong sturdy plants and quality fruit. Potassium naturally increases a plants resistance to all types of stress and is vital for cell growth and carbohydrate metabolism. Use Down To Earth Kelp Meal or Langbeinite.

Use of a dust mask is recommended for application of any dry fertilizer product.
