NET WT 5 LB (2.27 kg)

**AZOMITE** is a natural mineral product mined in central Utah. This unique deposit was formed when an ancient volcano erupted and its ash settled into a prehistoric seabed creating a complex mineral composition. AZOMITE can improve plant and root system growth, crop yields, and quality as well as re-mineralize nutrient depleted soils. Granulated AZOMITE is virtually dust-free and spreads easily on fields, garden soils and lawns or can be blended with other fertilizer materials as a trace mineral resource to help meet plant nutritional needs. It can be applied directly or in combination with composts, fertilizers, manures or soil inoculants.

#### **GUARANTEED ANALYSIS**

SOLUBLE POTASH (K <sub>2</sub> O)	0.2%
CALCIUM (Ca)	1.8%
MAGNESIUM (Mg)	0.5%
0.001% Water Soluble Magnesium	
SODIUM (Na)	0.1%

Derived from: Volcanic Ash

Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

#### **APPLICATION RATES**

**2.5 cups ≈ 1 lb; ¼ cup ≈ 1.5 oz; 1 Tbsp ≈ 0.4 oz**

**Vegetable Gardens & Flower Beds:** To prepare new gardens, apply 1-2 lbs per 10 square feet and thoroughly mix into the top 3" of garden soil in spring or fall. For new transplants, add 1 Tbsp per hole, mix into soil and water in well.

**Containers:** For new plantings, add 2-3 Tbsp per gallon of soil and mix thoroughly **OR** add 0.5-1 lb per cubic yard. For established plants, lightly mix 1 tbsp per gallon into the soil surface every other month during the growing season.

**Lawns:** Apply 2.5-5 lbs per 1,000 square feet and water in well. Three to four applications per year are recommended and results may be enhanced if applied following aeration. For new lawns, apply 5 lbs per 1,000 square feet and mix into top 3" of soil before seeding or sodding.

**Trees, Shrubs & Vines:** Spread 1 lb per 2" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well. For grapes, apply ½-1 lb to the soil around each plant and thoroughly mix into soil. For new trees, prepare transplant hole and mix 4-8 oz with the backfill soil. Use the amended soil to fill in around the new tree and water in well.

**ALL NATURAL FERTILIZERS**

Use of a dust mask is recommended for application of any dry fertilizer product.
